**PMBOK 5 Ed. – DEI-**

# Project Integration

Knowledge Area	Process				
	Initiating	Planning	Executing	Monitoring & Control	Closing
Integration	<ul style="list-style-type: none"> <li>Develop Project Charter</li> </ul>	<ul style="list-style-type: none"> <li>Develop Project Management Plan</li> </ul>	<ul style="list-style-type: none"> <li>Direct and Manage Project Execution</li> </ul>	<ul style="list-style-type: none"> <li>Monitor and Control Project Work</li> <li>Perform Integrated Change Control</li> </ul>	<ul style="list-style-type: none"> <li>Close Project</li> </ul>

# INTEGRATION

**“to identify, define, combine, unify, and coordinate the various processes and project management activities”**

# 4.1 Develop Project Charter

"A document that  
formally authorizes a  
project or a phase"

" Documenting initial  
requirements that  
satisfy the  
stakeholder's needs  
and expectations"

## Inputs

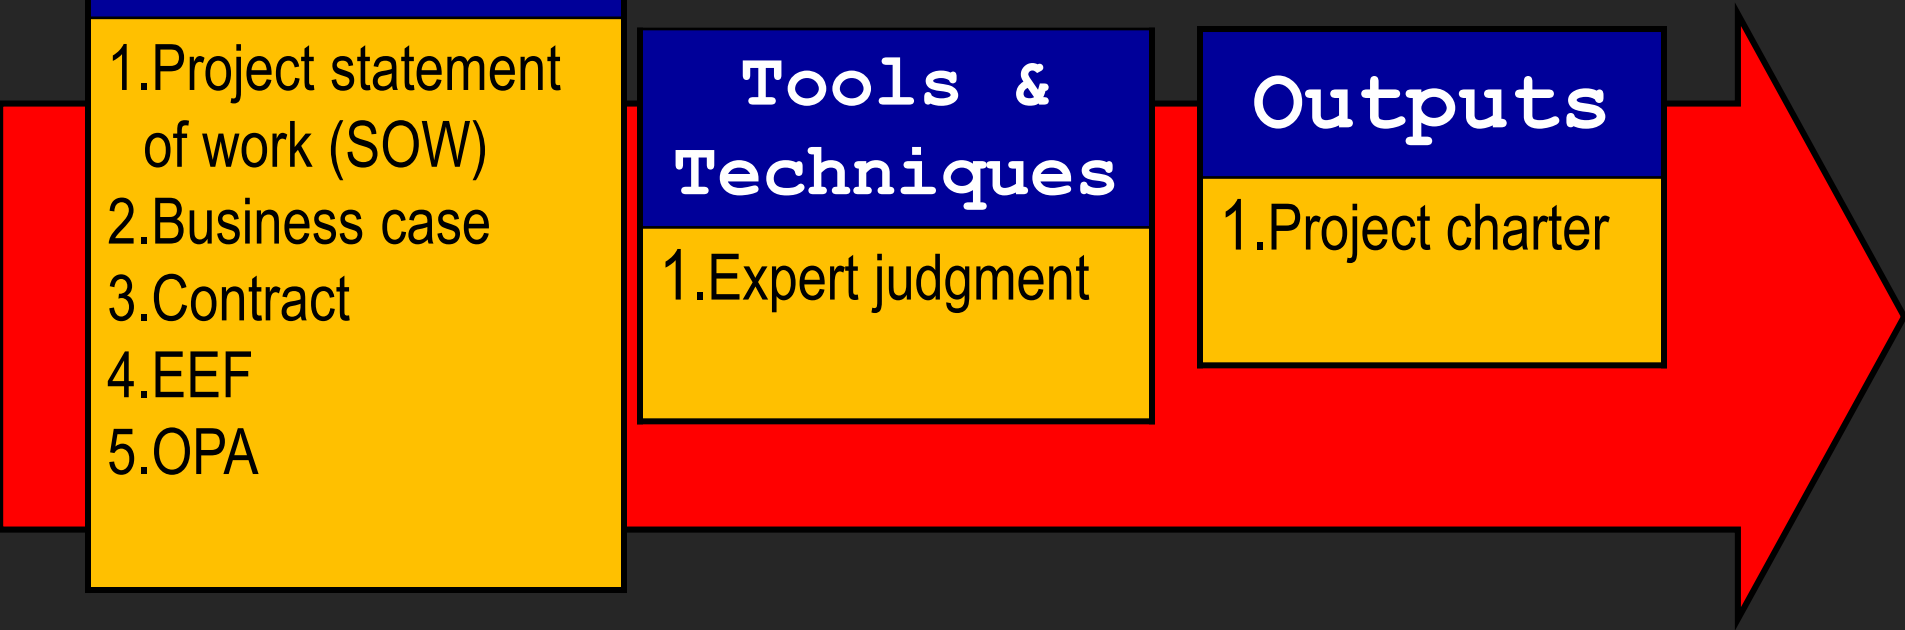

1. Project statement of work (SOW)
2. Business case
3. Contract
4. EEF
5. OPA

## Tools & Techniques

1. Expert judgment

## Outputs

1. Project charter

“Project are **authorized** by someone external to the project such as **sponsor, PMO, portfolio steering committee**”

“Project charter can **be created by them or delegated** to Project Manager”

- STATEMENT OF WORK
  - A narrative description of products or services to be delivered by the project.
  - The SOW references:
    - Business need
    - Product scope description
    - Strategic plan

# SOW

# Business case

» Determine whether or not the project **is worth the required investment.**

- Market demand
- Organization need
- Customer request
- Legal
- Technological
- ecological
- Social need

# Project Selection

Benefit measurement  
methods (Comparative  
approach)

Constrained optimization  
methods (Mathematical  
approach)

# Benefit measurement methods

- Murder board (**a panel of people** who try to shoot down a new project idea)
  - Peer review
- Scoring models (**Factor Rating**)
  - Economic models

# Constrained optimization methods (Mathematical approach)

- Linear programming
- Integer programming
- Dynamic programming
- Multi-objective programming

# Project Selection – Economic Models

- Present value (PV)
- Net present value (NPV)
- Internal rate of return (IRR)
- Benefit-cost ratio:

**BIGGER THAN  
ZERO**

- Payback Period

**The quicker the better**

# Project Selection – Important Terms

- **Economic Value Added (EVA):**
  - concerned with whether the project returns to the company more value than it costs.
- **Opportunity Cost:**
  - the opportunity given up by selecting one project over another
- **Sunk Costs:**
  - Are expended costs
  - Should not be considered when deciding whether to continue with a troubled project.
- **Law of Diminishing Returns:**
  - after a certain point, adding more input/resource will not produce a proportional increase in productivity

# Project Selection – Important Terms

- **Working Capital**
  - current assets minus current liabilities for an organization or
  - amount of money the company has available to invest
- Depreciation
  - **Straight line depreciation**
    - The same amount of depreciation is taken each year.
  - **Accelerated depreciation**
    - Depreciates faster than straight line
    - Two forms: (1) Double Declining Balance, (2) Sum of the Years Digits

# **EXPERT JUDGEMENT**

- Other unit within organization**
- Consultants**
- Stakeholders including customer or sponsor**
- Subject matter experts**
- PMO**
- Industry groups**
- Professional & technical association**

**BUSINESS NEED**

**DURATION**

**PM ROLE**

**OBJECTIVE**

**DO'S & DON'T  
APPROVAL**

**MAJOR  
STAKEHOLDER**

**BUDGET  
SUMMARY**

**SPEISIFICATION**

**MEASUREMENT**

# Project Charter

## To Reduce Canal Cleaning Cost by 50% Project Overview

### Business Case

- Canal is required for water management and transportation in peat land area
- Canal need to be cleaned twice in one rotation due to sedimentation
- Canal cleaning activities are done by contractor with fixed rate USD 3/ meter of canal
- Due to fuel price and spare part cost rising up, contractor propose to increase the rate or they do not want to do canal cleaning activity
- This project to address one of BSC KPI (F.1 Maintain wood delivery budget)

### Problem Statement

#### If we accept contractor proposal:

- Water management operational cost will be higher

#### But if we don't accept contractor proposal:

- Less availability of heavy equipment for canal cleaning
- Low accessibility and costly for firefighting and supervision

### Project Scope

Canal Cleaning activity  
Start : Mapping analysis  
End : Canal cleaned

### Team Selection

#### Green Belt:

#### Project Sponsor:

#### Project Champion:

Yudha

Michaer

Sofyan

#### Core Team Members:

Budi

Sigit

Arumi

Wahju

Guntar

#### Subject Matter Experts:

Brad

LP&C

### Goals Statement

Metric	UOM	Current rate	Goal
Canal cleaning cost	USD/m	3	1,5

### Opportunity Statement

#### Hard saving:

= Baseline x target x canal cleaning plan 2010

= USD 3x 50% x 43,186 m

= **\$ 64,779**

#### Intangible benefit:

- Improve ability to control and firefighting (reduce fire expression)
- Improve accessibility to compartment (reduce waiting time to compartment)

### Project Plan (June – October)

Phase	Start	End
Define	June 1	June 16
Measure	June 18	June 30
Analyze	July 2	July 21
Improve	July 23	Oct 12
Control	Oct 15	Oct 31

- Project Charter, includes:
  - Project **purpose** or justification,
  - Measurable **project objectives** and related success criteria,
  - High-level **requirements**,
  - High-level **project description**,
  - High-level **risks**,
  - Summary **milestone schedule**,
  - Summary **budget**,
  - Project **approval requirements**
  - Assigned **project manager**, **responsibility**, and **authority level**
  - Name and **authority of the sponsor** or other person(s) authorizing the project charter.

# 4.1 Develop Project Management Plan

A close-up photograph of a person's hand holding a silver pen, poised to write on a document. The hand is in the foreground, and the background is a blurred blue and white pattern, possibly a shirt or a wall.

**“Documenting the actions necessary to define, prepare, integrate and coordinate all subsidiary plans”**

**Documenting 10 knowledges area**

## Inputs

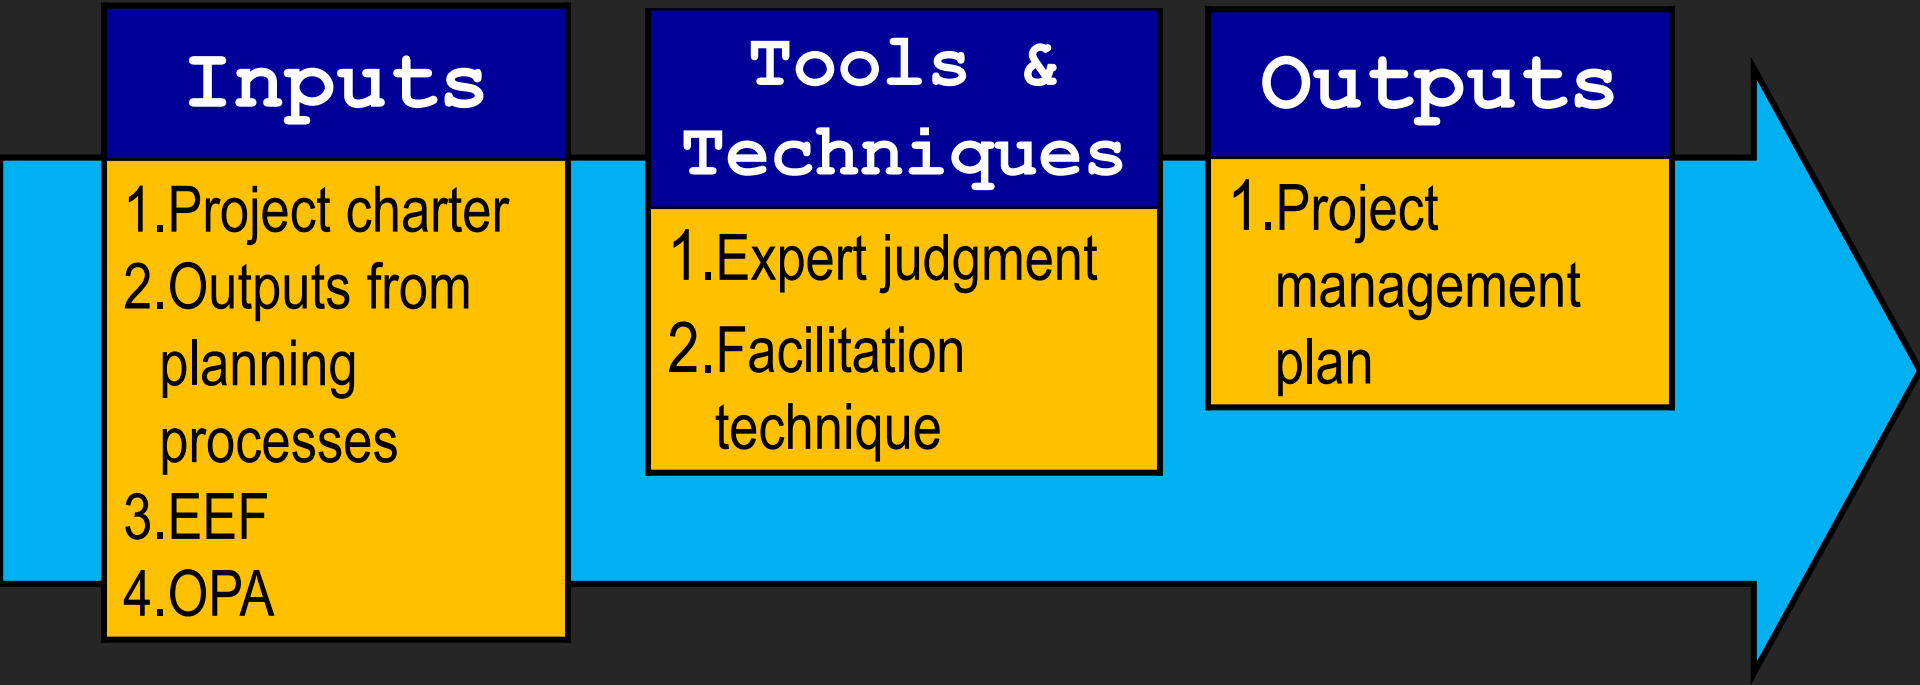

1. Project charter
2. Outputs from planning processes
3. EEF
4. OPA

## Tools & Techniques

1. Expert judgment
2. Facilitation technique

## Outputs

1. Project management plan

# Facilitation Tehcnique

» Brainstorming, meeting, solving the problem,  
conflict resolution

**Project Management Plan**

**Project Baseline**

**Subsidiary Plan**

**Analyze the gap or  
Deviation**

**Project Baseline**

**VS**

**Actual**

**scope**

**cost**

**time**

**Planning**

**Baseline**

**Actual**

# Baseline

**Project baselines include:**

- **Schedule baseline**
- **Cost performance baseline**
- **Scope baseline**

# Subsidiary

**Subsidiary plan include:**

- **Scope management plan**
- **Requirement management plan**
- **Schedule management plan**
- **Cost management plan**
- **Quality management plan**
- **Process improvement plan**
- **Human resource plan**
- **Communications management plan**
- **Risk management plan**
- **Procurement management plan**

# Project Management Plan

- **The strategy** for managing the project
- Define, plan, manage and

**Change management plan**  
**Configuration management plan**  
**Requirements management plan**  
**Process improvement plan**

---

# **Project Management Plan**

~~Plan A~~

**“How changes  
will be  
managed and  
controlled”**

Plan B

Change Management Plan

- Change control **procedures** (how and who)
- The **approval** levels for authorizing changes
- The creation of a **change control board (CCB)** to approve changes
- A plan outlining **how changes will be managed and controlled**
- Who should **attend meetings** regarding changes
- **Tools** to use to track and control changes

# Configuration Management Plan

- Manage **changes to the deliverables** and the **resulting documentation**, including which organizational tools you will use

## **4.3 Direct & Manage Project Execution**

**Performing the work defined in the project management plan to achieve the project's objectives**

## Inputs

1. Project management plan
2. Approved change request
3. EEF
4. OPA

## Tools & Techniques

1. Expert judgment
2. Project management information system
3. meeting

## Outputs

1. Deliverables
2. Work performance data
3. Change requests
4. Project management plan updates
5. Project document updates

# PROJECT MANAGEMENT PLANS

Baseline + subsidiary  
plan

# PROJECT DOCUMENTS

Memo, project logs, risk  
register, stakeholder  
register

**VERSUS**

## 4.4 Monitor & Control Project Work

**Tracking, reviewing, and regulating** the progress to meet the performance objectives defined in the project management plan.

## Inputs

1. Project management
2. Schedule forecast
3. Cost forecast
4. Validated changes
5. Work Performance information
6. EEF
7. OPA

## Tools & Techniques

1. Expert judgment
2. Analytical techniques
3. Project management information system
4. meeting

## Outputs

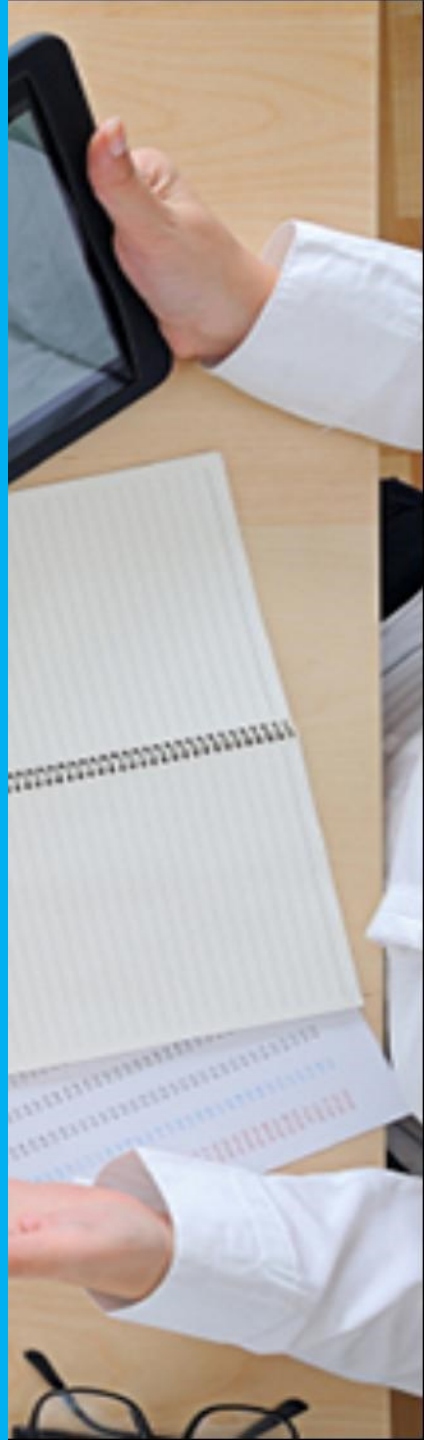

1. Change requests
2. Work Performance report
3. Project management plan updates
4. Project document updates

## 4.5 Perform Integrated change control

**Reviewing,  
approving and  
managing** changes to  
deliverables, OPA,  
project documents  
and the project  
management plan.

## Inputs

1. Project management plan
2. Work Performance reports
3. Change request
4. EEF
5. OPA

## Tools & Techniques

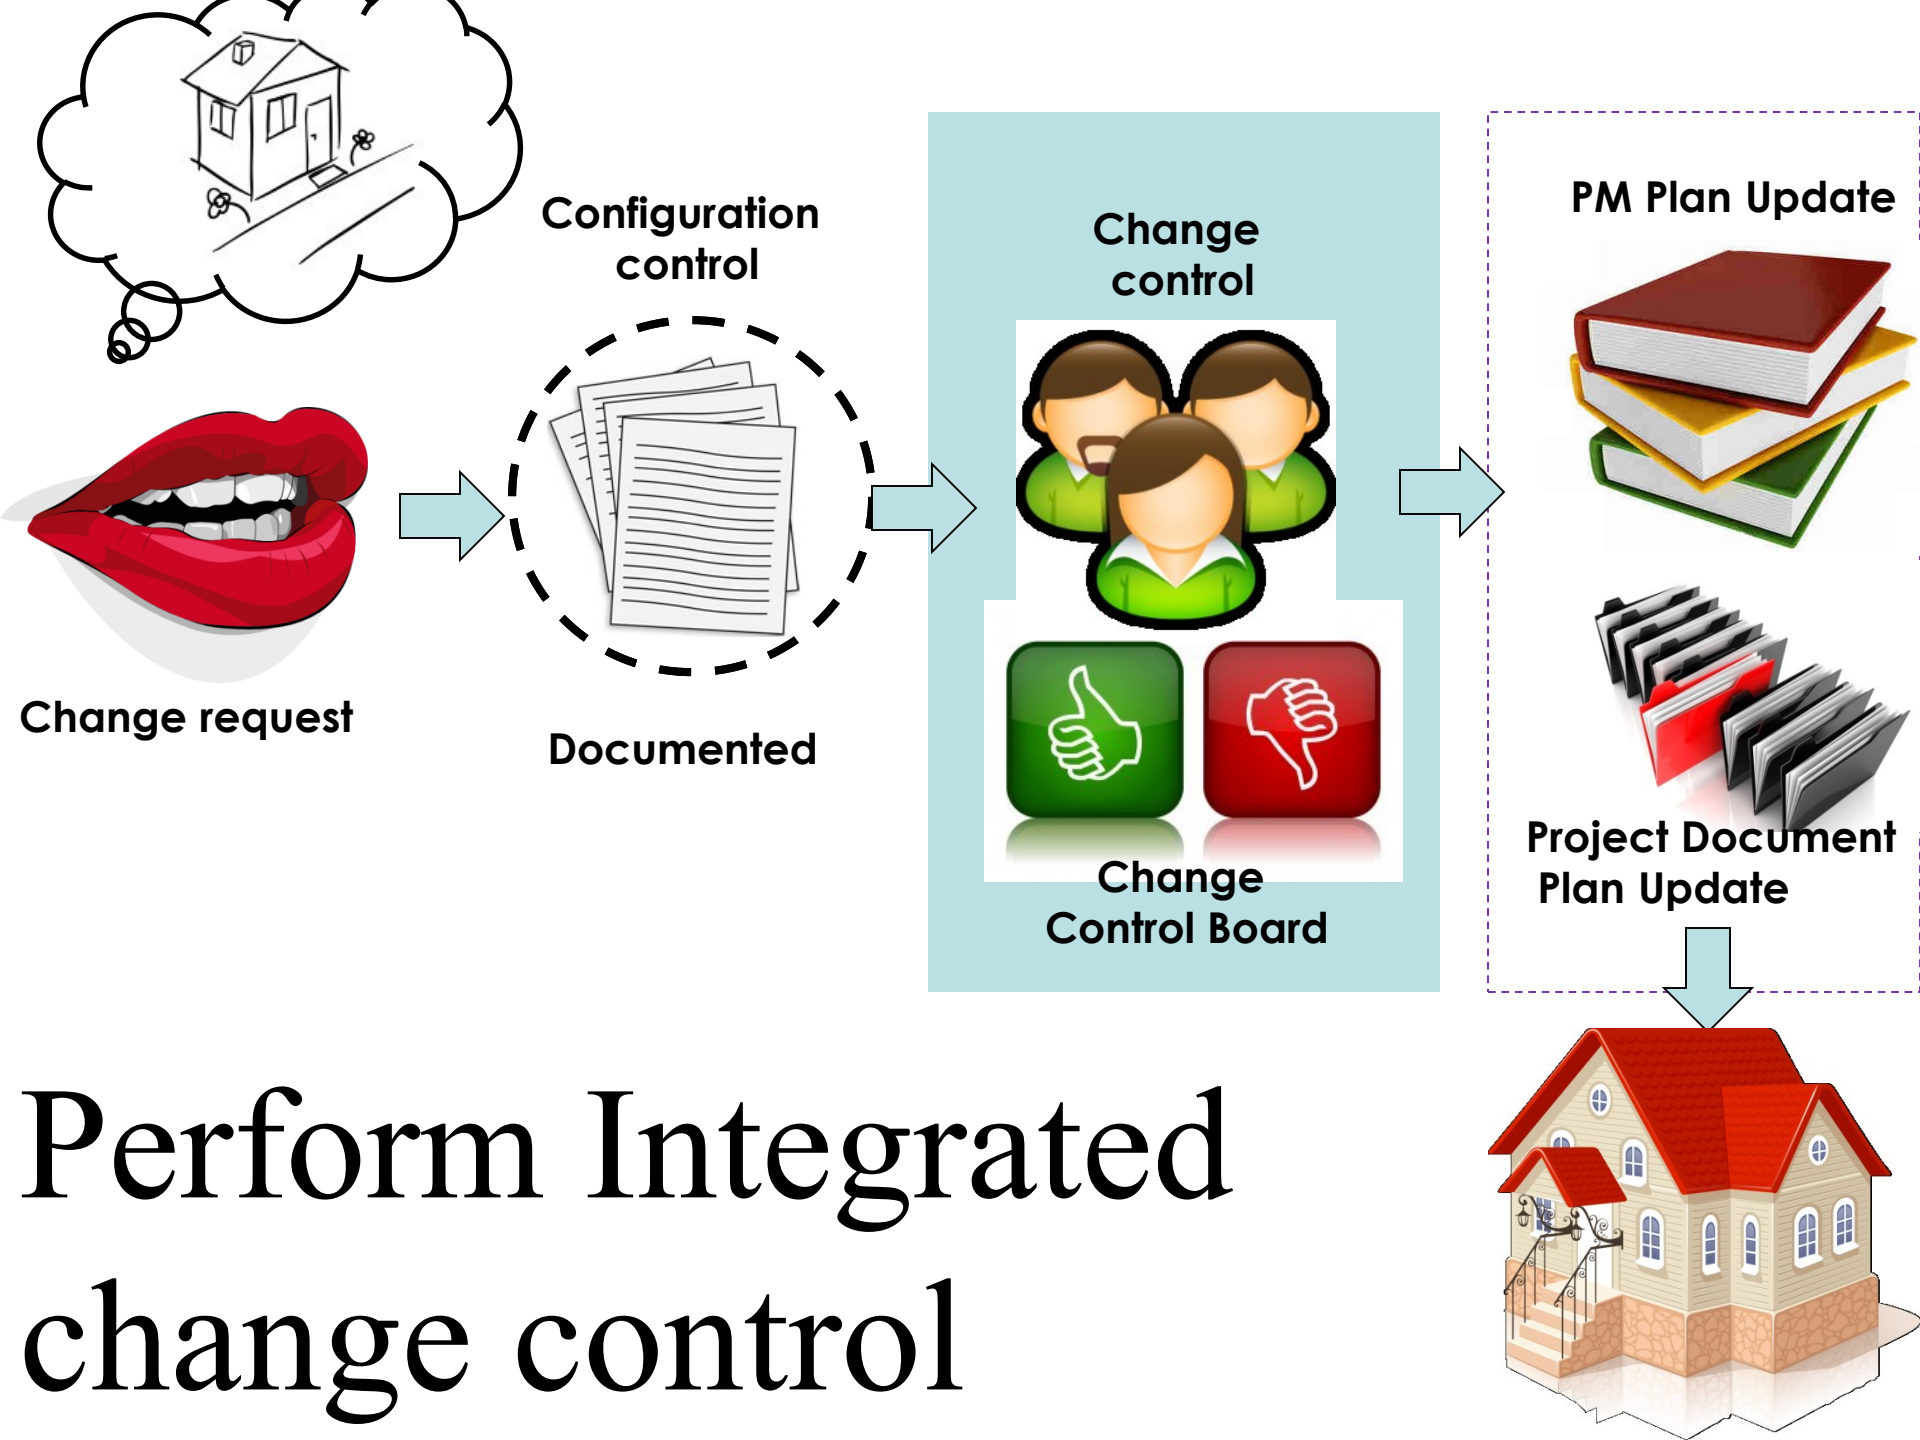

1. Expert judgment
2. Meetings
3. Change control tools

## Outputs

1. Approved Change requests
2. Change log
3. Project management plan updates
4. Project document updates

A photograph of three business professionals (two men and one woman) smiling and looking upwards, standing in front of a modern glass skyscraper. The man on the left is wearing a dark suit and a blue tie. The woman in the center is wearing a white shirt. The man on the right is wearing a white shirt. The background is a blue glass building with a grid pattern.

## 4.6 Closing Project

**“Finalizing all activities across all of the Project Management Process Groups to formally complete the project or phase”**

## Inputs

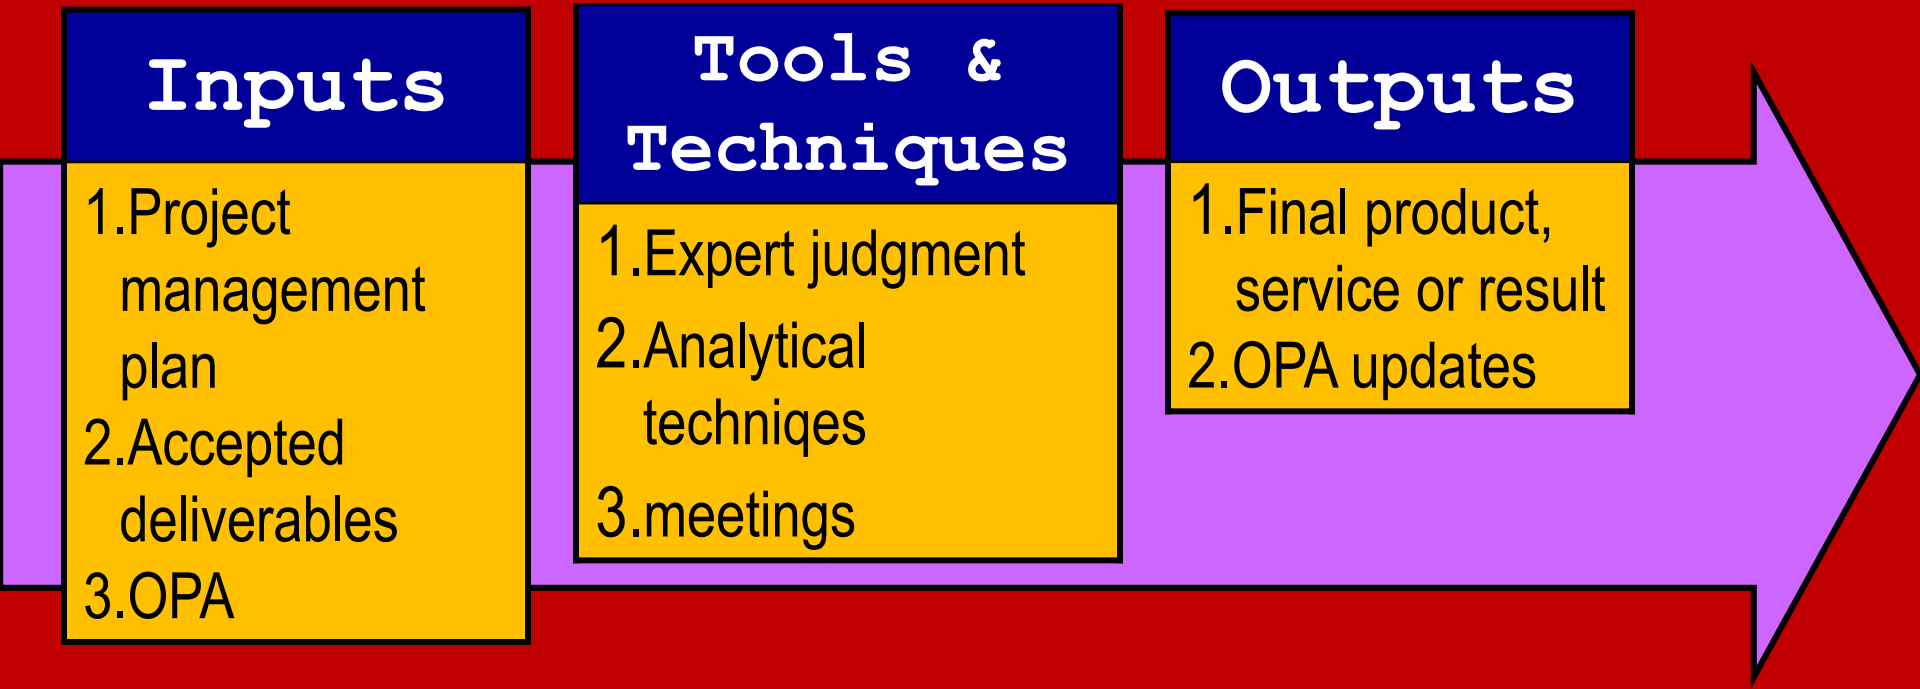

1. Project management plan
2. Accepted deliverables
3. OPA

## Tools & Techniques

1. Expert judgment
2. Analytical techniques
3. meetings

## Outputs

1. Final product, service or result
2. OPA updates

# CASE STUDY

## AIRBUS A380-800

# What went wrong?

- 2 years behind schedule → loss \$6,1 billion
- Cause? Integration-disintegration (no clear project integration)
- Pre-assembly (German) to assembly Line (France) mismatch-CATIA Problem
- Trouble in wiring (harness)

# Try this game
